

ASKIA | 2022 EASYSIDE CATALOG

**In these ever evolving times,
workspaces are changing frequently,
adapting to one's needs and values.**

In response to the ergonomic challenges in the workplace, we developed a new range of desks that impresses with an innovative and functional design, as well as high product intelligence.

Designed with the main purpose of making workflows faster and easier, these desks bring a significant contribution to keeping the body and mind active, and are available in a variety of designs, colours and surface finishes.

Great ideas come from great challenges.

Made with people and spaces in mind, these desks and benches make up the **EASYSLIDE Collection**. The name comes from the worktop's sliding mechanism, a standard option, that provides easy access to all cables and accessories.

The collection features 4 leg profile options available in multiple finishes.

Make it your own

Be there or be square. Or not, you can choose between 4 available leg shapes and multiple finishes to give your space a personalized look.

01

Easy to configure your space

The **EASYSLIDE** desk family suits offices with various organisation systems: Designated workspaces, Co-working spaces, Hot-desking.

Easy to create your workspace

Instead of the basic legs, you can attach middle sections on the base framework and create benches as long as you want.

02

Easy access to your cables

Just **slide** the top to access your cables, battery banks, power bricks, sockets, or whatever you want to hide there, we don't judge.

Step 1
Unhook the tab and pull the handle towards you

Step 2
Pull continuously until the cable tray is revealed.

Step 3
The stopper will prevent the countertop from sliding completely.

03

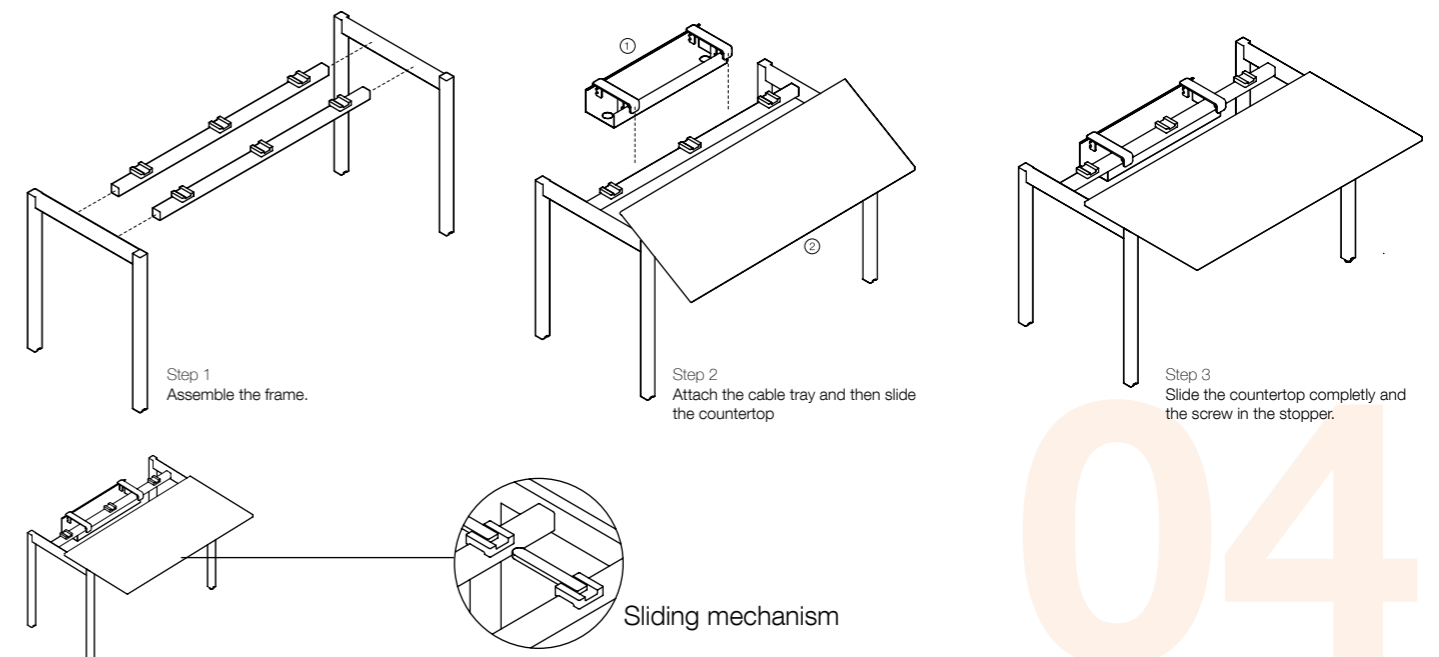

The cable tray can be mounted at 3 different heights.

In its lowest position, you can fit a charger as big as 83mm, depending on the power socket.

Easy as 1 2 3!

The framework is easy to assemble. Using just an allen key, attach the legs and then the cable tray. The top is attached without any screws using quick fix connectors.

Step 1
Assemble the frame.

Step 2
Attach the cable tray and then slide the countertop

Step 3
Slide the countertop completely and the screw in the stopper.
